## Evening Brief

Date: Friday August 7, 2020

### Weather Summary

#### Weather:

**\*\*\* Gusty Winds/Low RH over Southern/Eastern Idaho this Weekend \*\*\***

**\*\*\* Scattered Thunderstorms Early Next Week for Western/Northern Nevada \*\*\***

Gusty winds will continue this weekend in southern and eastern Idaho as a weather disturbance crosses to the north of the area. Wind gusts 25-35 mph are expected in these areas. RH will be higher across the northern half of the Great Basin, but still drop to 12-16%, with exceptionally low RH in the single digits and poor overnight recovery 20-30% further south.

Sunny and dry weather is expected through the weekend. On Monday another disturbance increases the potential for isolated thunderstorm activity across mainly western Nevada. **More widespread thunderstorm activity is expected across western and northern half of Nevada, possibly into far southern Idaho and far northwest Utah on Tuesday. High Risk has been issued for this event (see forecast matrix).**

Dry weather is expected to continue over eastern NV and much of Utah through the work week.

### Fuels/Fire Potential

**\*\*\* Fuels and Fire Behavior Advisory is currently in effect for parts of eastern and southern Nevada into western Utah and the AZ Strip \*\*\***

Fuels in all regions, of all class sizes, will continue to rapidly dry.

Abnormally dry fuels continue across the southern portion of the area.
